

SURYA SINGH

Backend Engineer | Python, FastAPI, Docker, AWS | REST API Design & Cloud Deployment

☎ +91-7084054701 ✉ suryapratapsingh7054039@gmail.com 🌐 Website 🐙 GitHub 🌐 LinkedIn 📧 Medium 📍 Kanpur, India

PROFESSIONAL SUMMARY

Backend engineer with proven experience designing and deploying production systems on AWS EC2. Built real-time event processing services, secure REST APIs with JWT authentication, and scalable database architectures. Strong foundation in Python, FastAPI, and cloud infrastructure.

PROJECTS

GitHub OSS Issue Notifier | 🐙 Github

Developer

- **Developed real-time issue monitoring service** Tracks 10+ repositories and processes 100+ issue events daily.
- **Deployed on AWS EC2** using **Docker**; automated deployment pipeline via **GitHub Actions**—any code push triggers production update.
- Saves ~2 hours/week of manual tracking; processes 100+ daily events unattended in production.

Technologies / Tools Used : Python, FastAPI, Docker, AWS EC2, GitHub Actions

CGAN Synthetic Financial Data Generator | 🐙 Github 🌐 Live-Demo

Developer

- **Developed a Conditional GAN (CGAN)** to generate synthetic fraud transaction data and address class imbalance in the IEEE-CIS dataset.
- **Generated 5,000** synthetic transactions and validated data quality through feature distribution and drift analysis.
- **Achieved 97.25% accuracy, 96% precision, and 0.80 F1-score** using **Random Forest** evaluation, deployed results via a Streamlit dashboard.

Technologies / Tools Used : Python, Pytorch, Pandas, Scikit-learn, Numpy

Drive Clone (Google Drive Replica) | 🐙 Github

Developer

- **Built** secure file storage platform with JWT auth and RBAC.
- **Designed** scalable **MongoDB** schema supporting concurrent file operations and multi-tenant data isolation.
- **Implemented** file upload/download APIs, sharing mechanisms, and session management deployed on production environment.

Technologies / Tools Used : Node.js, Express, MongoDB, Supabase, Tailwind CSS, EJS, Bcrypt, Cookie-parser

SmartRecruitAI (Resume Analyzer) | 🐙 Github

Developer

- **Developed** a resume analysis backend utilizing **Python** and **NLP** techniques to extract candidate information.
- **Integrated** Gemini API for recommending job roles based on extracted skills and experience.
- **Automated** the resume screening workflow, enhancing recruitment efficiency.

Technologies / Tools Used : Python, NLP, Gemini API

EDUCATIONS

Naraina College of Engineering & Technology | Kanpur

B.Tech in Computer Science Engineering

2023 - 2026

CGPA : 6.72

SKILLS

Programming Languages :	Python, SQL
Frameworks & Libraries :	FastAPI
Databases :	MongoDB, PostgreSQL, Supabase, MySQL
Tools & Platforms :	GitHub Actions, Git, GitHub, Linux, Docker, AWS EC2, CI/CD, Nginx, JWT Authentication, SSL/TLS
ML Libraries :	Pandas, NumPy, Scikit-learn, PyTorch
Core CS Fundamentals: :	DBMS, OS, Computer Networks, OOP

ACHIEVEMENTS

- **Active GitHub:** Contributed 400+ commits (2024–2025) through personal projects and open-source contributions.
- **Hackathon Participant:** Engaged in the Adobe India Hackathon 2025 and attended AI/ML and Blockchain workshops at Cognizance IIT-Roorkee.

TECHNICAL WRITING

- [Building an OSS Issue Notifier with FastAPI, Docker & AWS.](#)
- [Generating Synthetic Financial Data Using CGANs.](#)
